

Work Related Learning - Mechanic

The children decided they wanted to find out what it would be like to work at a garage. We pretended to drive a bus, and role played the bus breaking down. A mechanic was needed to fix it! We learnt that mechanics need to do lots of training to learn to use tools to fix a variety of vehicles.

We looked at pictures of local garages to see what they looked like and what was inside them. We found that men and women both work as mechanics. We had great fun pretending to change tyres, fix engines and do MOT's to make sure the vehicles are safe.

We had a till to take money because we found out you have to pay for your repairs.

The children loved finding out all the facts about being a mechanic.
