

Work Related Learning - Year 3

Can I research and discuss what an archaeologist does?

During our Work-Related Learning Day in Year 3 we looked at the role of an archaeologist. We researched what their job is, what qualifications you need to become an archaeologist and where they work

In groups we examined different types of rock to decide where an archaeologist might find a fossil and created our own posters advertising for a new job on our school grounds. We talked about what skills and qualifications an archaeologist would need.
