

Work Related Learning

In Year 5, we have looked at the role of an engineer. We looked at how the engineer was in the process of creating a high-speed, high-powered car which would be able to travel at incredible speeds in short periods of time.

We linked this learning into our topic of the Ancient Egyptians where we discussed how the Egyptians would need to create accurate and clear designs to build their pyramids. We discussed how these feats of engineering would differ from the work of engineers today.

Also, we discussed how the work of this particular engineer linked into our learning of force in Year 5.
