

# Year 3

## Work Related Learning September 2021

In year 3, we decided to look at jobs and careers that involved working animals and discussed as many varying roles as possible from vets and mountain rescue teams to dog walkers and jockeys. We then narrowed our focus on to careers that involved looking after animals and decided on a list of qualities needed to become a vet! We decided that the welfare and needs to look after animals was our top priority when becoming a vet. Following some research, we discovered that to become a vet you need to register with the Royal College of Veterinary Surgeons and attend University for 5 years!

We watched many videos about workers who look after animals. We started with a vet, looking after household animals and the reason that she decided to join this career. She gave us an insight into her daily routine along with a tour around her surgery. Next, we looked at zookeepers looking at the weights of different animals such as elephants and porcupines. Then lastly, we headed to the aquarium which looked at rehousing some alligators into their new homes and Maggie the turtle that needed some dental work!
